### Fire on board M/V Maersk Honam 806W

Asia to the Mediterranean

Situation update 6 – state of salvage operations

17<sup>th</sup> April 2018

Dear Customer,

We wish to update you on the situation regarding the salvage operations for Maersk Honam, which is currently being towed towards the anchorage area near Jebel Ali. Extinguishing remaining hot spots and other work in order to stabilize the vessel will be done there. Due to the complexity of the firefighting operations undertaken to cool down the hot spots, a further delay of 10 days is expected before the vessel arrives at the anchorage.

The vessel will move to the port of Jebel Ali for discharge operations only after all hot spots are completely extinguished and the vessel is stabilized at the anchorage area.

We will keep you updated about further developments and thank you for your understanding and cooperation.
