Incident on board M/V Maersk Honam 806W

Asia to the Mediterranean

Situation update 9 – Free time conditions

6 June 2018

Dear Customer,

We wish to update you on the situation regarding the salvage operations for Maersk Honam.

The ship berthed in the port of Jebel Ali on 27 May 2018 and discharging operations have now been completed. We will now arrange for on-carriage of the containers to final destinations. Details will be communicated to you as soon as available.

Please keep in mind that only containers which have been released by the General Average adjusters will be delivered to the receivers at destination. In case any damage to cargo is identified after delivery, joint inspections can be arranged together with your local Hamburg Süd representative.

In case storage of containers is necessary at final destination due to still outstanding GA & Salvage securities, we will charge 10 USD per day per container as from the 31st day after the date of discharge at Jebel Ali. Therefore, in case you or your insurers haven't submitted the security documents yet, we kindly remind you to arrange same with the GA Adjusters, Richards Hogg Lindley (RHL), as soon as possible in order to avoid extra costs and further delay in the on-carriage process.

Thank you for your understanding and cooperation.

Hamburg Süd
